Bass Boost

We are excited to introduce a brand new range of Bluetooth speakers, featuring passive membranes on both sides to enhance the bass experience. These speakers also incorporate new light effects that visually enhance the sound, creating a truly immersive audiovisual experience.

Digital Audio Broadcasting (DAB)

Discover our full range of products featuring the latest digital audio broadcasting technologies for better sound quality and improved reception.

Vision

Introducing our latest line of clock radios, featuring dome lenses that offer a completely new display experience.

Mood light

Our outdoor models combine powerful sound with vibrant lighting for the ultimate music experience.

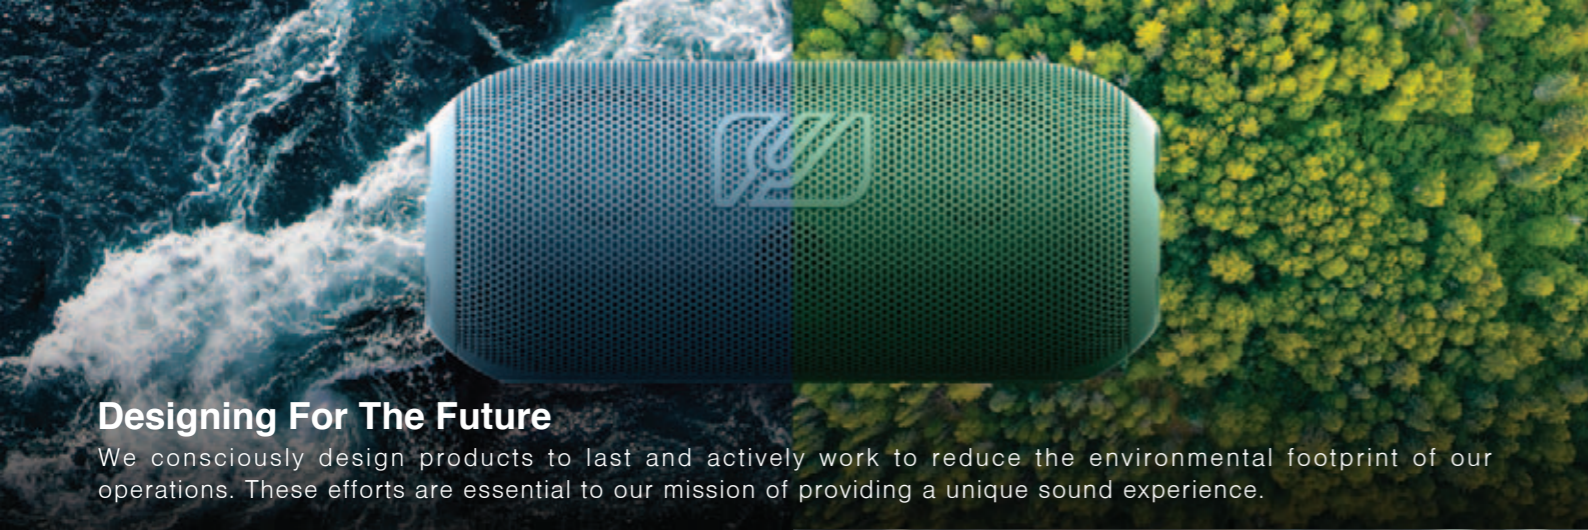

Shock Resistance

The new range of jobsite speakers offers enhanced water and shock resistance, designed to withstand extreme outdoor conditions.

Vintage

Explore our range of Ghetto Blasters, portable cassette players and turntables that blend vintage style with the latest technology.

Designing For The Future

We consciously design products to last and actively work to reduce the environmental footprint of our operations. These efforts are essential to our mission of providing a unique sound experience.

Eco-Contribution

As a responsible electronic equipment brand for the planet, we participate in "eco-contribution" so that high-impact associations focused on environmental preservation and restoration can take action.

Recycling responsibly

We also consciously design packaging that prioritizes materials accepted by recycling programs. For example, we eliminate lamination from our packaging to improve its recyclability and recoverability.

Modernizing our materials

By switching to post-consumer recycled plastics and reducing the use of virgin materials, we make our products circular. Most of our models are composed of over 40% post-consumer recycled plastics, minimizing our dependence on virgin plastics and reducing our environmental impact.

Packaging with care

A holistic approach to product circularity must include packaging. Our sustainable packaging solution uses recycled paper or plastic from recycling streams. In 2024, new product packaging contained materials sourced from sustainable sources. By 2025, we aim to use at least 90% post-consumer recycled content or recyclable plant fibers in our new packaging.

Supply chain responsibility

Establishing productive and long-term relationships with suppliers is essential to the growth and success of our company, which is why we share a social and environmental vision with companies that make up our supply chains.

Increasing energy efficiency

We have developed more efficient hardware and software, enabling our models to achieve less than 2 watts on stand-by mode. Our new product lines also feature energy-saving capabilities that we seek to implement in all new devices to reduce energy consumption.

The lifecycle of our products

As we continue our journey towards sustainability, we focus on considering the total environmental impact of our products, from manufacturing, transport, use and end of life. Our environmental expectations for products defines our vision for the sustainability performance of specific products.

LIGHT

CLOCK RADIO

ML-198 CR
LIGHT CLOCK RADIO PLL

• Multicolor ambience light with color selection • White light with adjustable brightness • Amber LED display with dimmer • FM PLL radio with 20 preset stations • 6 sounds of nature • Wake to sounds of nature, buzzer or radio • Dual alarm, snooze and sleep functions • USB-C charging port for smartphone or tablet • Aux in jack • DC jack for external AC adaptor (provided) • Battery backup : 2x1.5V \equiv type AAA/R03/UM4 (not included)
